

# 6 STATION MAGNETIC STIRRER

A magnetic stirrer is a device widely used in laboratories and consists of a rotating magnet or a stationary electromagnet that creates a rotating magnetic field.

## Product Features

- Six controlled stirring positions.
- Powerful magnets for strong magnetic coupling.
- Easy Stir controls.
- Easily accommodate a 2-L beaker in each position also available in 5 L.
- Stainless steel top plate does not prod -uce eddy current to ensure powerful stirring action.
- Description: Six Position Magnetic Stirrer; 220 VAC, 50 Hz

# **Key Features**

### Of 6 Station Magnetic Stirrer

| Material               | : Stainless Steel                   |
|------------------------|-------------------------------------|
| Volume cap.            | : 2 L each station                  |
| Speed range            | : 1500 RPM                          |
| Stirring position      | : 6                                 |
| Maximum stirring range | : Can use upto 80mm bar Lower speed |
| weight                 | : 10 kg                             |
| Warranty               | : 1 Year                            |
| Top Plate Length (in)  | : 19                                |
| Top Plate Width (in)   | : 13                                |
| Length (in)            | : 22                                |
| Width (in)             | : 14                                |
| Height (in)            | : 6                                 |
